

## “TURBOCHARGE your hotel with momento<sup>hs</sup>® sprint... The only ERP-like software you need to know.”

momento<sup>hs</sup>® sprint is engineered from the award-winning next generation momento<sup>hs</sup>® enterprise suite, the first ERP-like hospitality management software far exceeding current industry standards. Right-sized to meet the functional requirements of small-medium hotels (up to 150 rooms), it delivers stellar business performance with the added advantage of seamlessly upgrading to momento<sup>hs</sup>® enterprise as and when required. User friendly and easy to understand as 1-2-3, training and installation is undertaken within 20-28 days.

Based on Microsoft Windows and SQL Server technologies, momento<sup>hs</sup>® sprint inherits the manageability, security, scalability and high performance benefits offered by this platform.

“Within the first few minutes it becomes clear that momento<sup>hs</sup>® can’t be compared to standard products on the market today. momento<sup>hs</sup>® is truly a cross-departmental solution.” - Keith Gruen, ex co-founder of Fidello - Munich, Germany, 9 January 2009

Core modules consist of Front Office, Financial, POS, Food & Beverage and Call Billing, which can be deployed individually or in a phased manner. Additional modules can be easily integrated, which includes Event Management, Fixed Asset and Business Intelligence. Third party Intellectual Capital (Human Resources) & Payroll and Microsoft CRM can be integrated easily. All modules maintain a consistent look and feel in their Graphical User Interface similar to Microsoft Windows.

### Key Highlights of momento<sup>hs</sup>® sprint

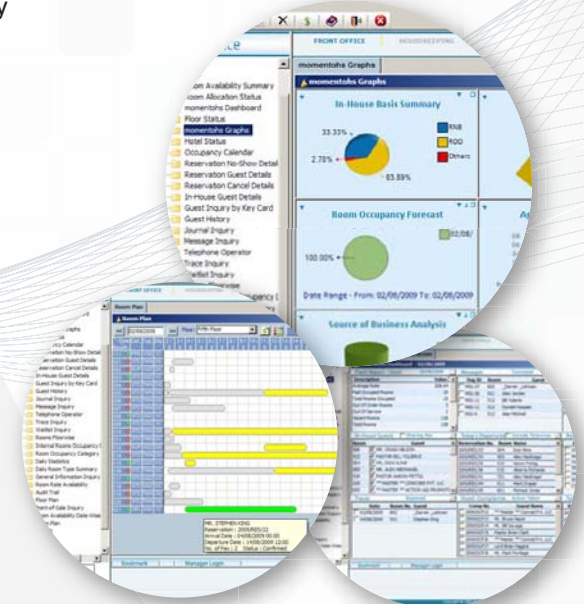

- Low cost of ownership
- Quick deployment
- Integrated and scalable
- Low cost of maintenance

The open architecture allows it to be interfaced with third-party devices such as the hotel PABX, key lock, smart card etc. and Windows-based Point of Sales systems. momento<sup>hs</sup>® sprint also provides a Web interface that enables head office, individuals and registered travel agencies to make reservations and inquire about prices and availability of rooms over the Internet.

momento<sup>hs</sup>® sprint is rapidly gaining industry acceptance for its price-performance advantage, with many hotels replacing end of life industry standard software with momento<sup>hs</sup>® sprint.
